Introduction:

Few Questions

- What if specially-abled people could code without using their hands?
- Can people with injuries to their hands, or muscular dystrophy patients, code?
- Can you code without using mouse and keyboard?

Yes, you heard it right.

Code while You Talk

CoYoTa

Code while You Talk

What is CoYota?:

- Code while You Talk
- Harnessing the power of AI, and in order to put away all the difficulties in coding world, we present you, CoYoTa.
- CoYoTa is an Al-based code editor that allows you to code in parallel in JavaScript and Python just by conversing with it.
- Gone are the days of Scratch, kid can simply speak to CoYoTa and it will show you how things are supposed to be. It helps learn programming the AI, way.
- CoYoTo is for computer engineers and by the computer engineers.
 - Panic, Depression?? Let's try COYOTA then.

Why is there a need of CoYoTa?

- RSI (Repetitive Strain Injury).
- Carpal Tunnel Syndrome.
- Rotator cuff.
- Various nerve issues.
- Numb fingers.
- Many more..

How CoYoTa Solves the problem?

Turn on the mic of your device i.e. your PC or your Laptop

- Just say whatever you want to do in your code editor. For example: If you want to have a for loop then just say "create a for loop with 10 counts" and CoYoTo will do the rest for you. Isn't it very simple?
- When you are done with the coding part then just say "JavaScript Run" or "Python Run" and CoYoTo will serve the output.

Features at a Glance

Looking for Voice to Code? Hold On, we have something more for you.

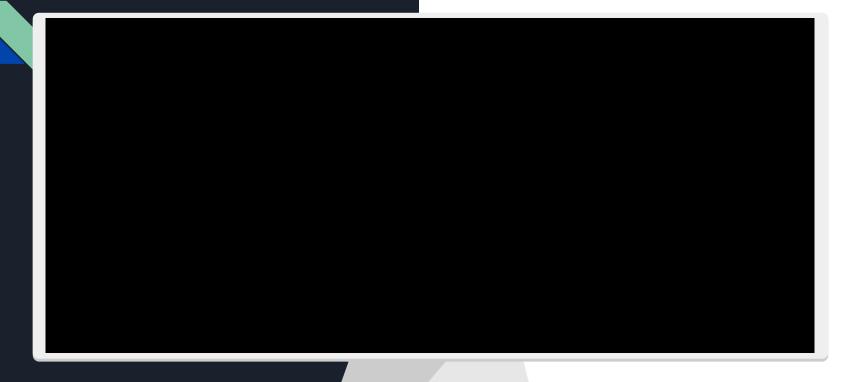

(Bonus)

- 01 | Code in Natural Language
- O2 | Obtain parallel clean code in JS and Python
- 03 | Navigate through the code just by voice

- 04 | Easy toggle between the languages
- 05 | Supports English as well as Hindi
- 06 | Support of Emacs and Vim key bindings

Feeling Bored? Let's have a quick demo

CoYoTa

Technology Stack

- Aa Bb Cc DdEe Ff Gg Hh II Jj Kk Ll Mm Nn Oo Pp Qq RrSs Tt Uu Vv Ww Xx Yy Zz ?!! `

- Natural Language Processing (Bravey)
- Node.js
- Flask

Future Scope

- More functionalities such as classes, objects, etc. are to be added.
- The project will be completed over 1 month.
- The project will have more datasets, hence accuracy will get increase.
- The project will be made simpler by training it with more natural voice commands.
- People who cannot speak clearly can also use it.
- Languages other than JavaScript and Python, will be added.
- Native languages like Marathi, Bengali etc. will also be added.

Any Questions?

Thank You!
